

Feline Cognitive Assessment Tool

Made in conjunction with Leticia Fanucchi, DVM, PhD

This assessment tool helps identify early signs of cognitive decline and assess your pet's mental acuity, enabling timely intervention and management by you and your veterinary healthcare team. After completing this form, your veterinarian will work to determine the cause(s) of these signs through a physical examination and recommended diagnostic tests. For any questions or concerns, please consult your veterinarian

PLEASE FILL OUT THE SURVEY BELOW USING THE FOLLOWING SCORING SYSTEM

- 0** I have never observed this behaviour in my pet
- 1** I have observed this behaviour at least once in the last 6 months
- 2** I have observed this behaviour at least once per month
- 3** I have observed this behaviour at least 2-4 times per month
- 4** I have observed this behaviour several times per week
- 5** I have observed this behaviour at least once per week

CATEGORY	BEHAVIOUR	SCORE	CATEGORY TOTAL
